PROFILE SUMMARY

Flutter Developer with 2+ years of experience building production-oriented mobile apps across marketplace, healthcare, logistics, and booking domains. Strong in Flutter, Dart, Clean Architecture, BLoC/Cubit, Dio, Firebase, real-time features, localization, and offline-first patterns. Currently contributing to a multi-role marketplace app at ecoZone and previously built React/ASP.NET healthcare inventory workflows during 88ninety's Summer 2026 internship.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Cubit/BLoC, Clean Architecture, Dio, GoRouter, Firebase, Hive, SQLite

Frontend: React, TypeScript, Vite, TanStack Query, Axios, Ant Design

Backend: ASP.NET Core, C#, EF Core, SQL Server, REST APIs

Engineering: Dependency Injection, WebSockets, Authentication, RBAC, Pagination, Testing

Tools: Git, GitHub, GitHub Actions, Docker, Postman, Jira, Agile/Scrum

Soft Skills: Problem Solving, Team Collaboration, Communication, Attention to Detail

EXPERIENCE

Flutter Developer | ecoZone

Apr 2026 — Present | Full-time, Remote

- Architected and developed a large-scale, multi-role Flutter marketplace application using Feature-first Clean Architecture and Cubit/BLoC state management.
- Engineered real-time communication features and live data synchronization using WebSockets/Pusher for dynamic user experiences.
- Implemented secure JWT-based authentication, dynamic role-based access control (RBAC), and push notifications across distinct user applications (Buyers, Sellers, Service Providers).
- Adhered to strict enterprise security standards, ensuring data protection, secure API communication, and scalable codebase maintainability.

Software Engineering Intern — Full Stack Development | 88ninety

Jun 2026 — Aug 2026 | Part-time, Hybrid/On-site | [\[Github\]](#) · [\[Demo Video\]](#)

- Contributed to an enterprise-grade, On-premise Hospital Storage Management system built with ASP.NET Core 10 (C#) and React 19.
- Engineered complex UIs for inventory management using TypeScript, Vite, and Ant Design, integrated seamlessly with SQL Server databases via typed Axios and React Query clients.
- Developed and enforced dynamic, permission-based authorization (Roles × Permissions matrix) to secure sensitive medical inventory operations.
- Wrote comprehensive automated tests (85+ Vitest files) ensuring high reliability for frontend modules in a highly regulated healthcare environment.

Freelance Flutter Developer | Remote

2024 — Aug 2026

- **Qeyadah (Driving School):** Delivered a dual-role Flutter platform with 35+ screens, complex booking workflows, typed conflict resolution, multipart document uploads, and robust session restoration | [\[Github\]](#) · [\[Demo Video\]](#)
- **Mawaqef (Smart Parking):** Built a Flutter smart-parking platform with interactive maps, secure payment integration, role-based workflows, and offline data synchronization | [\[Github\]](#) · [\[Demo Video\]](#)
- **Shifaa (Healthcare App):** Built a Flutter healthcare app with End-to-End encrypted chat using AES-GCM/ RSA, offline-first appointment caching with SQLite, and secure patient communication | [\[Github\]](#) · [\[Demo Video\]](#)
- **SoldOut (Multi-Vendor Delivery):** Developed a Flutter delivery platform with live driver tracking, geolocation, and OSRM-based route optimization for multi-stop deliveries | [\[Github\]](#) · [\[Demo Video\]](#)

EDUCATION

Damascus University

B.Sc. in Information Technology Engineering, Software Engineering

CERTIFICATIONS

Flutter Development Training — OUSOS Training & Human Resource Development | [Link](#)

Completed an intensive training program focused on **Flutter mobile development**, covering **state management**, **REST API integration**, and modern mobile development best practices

Final Grade: 100% (Excellent)

LANGUAGES

Arabic: Native

English: Proficient
