PROFILE SUMMARY

Full-Stack & Mobile Developer with 2+ years of software engineering experience building enterprise web systems with ASP.NET Core (.NET 10), EF Core, SQL Server, React 19/TypeScript, and JWT security, alongside production Flutter apps.

TECHNICAL SKILLS

Backend: ASP.NET Core (.NET 10), C#, EF Core, SQL Server, ASP.NET Identity, JWT & Refresh Tokens, REST APIs, RBAC, Autofac, Serilog, RFC 7807
Frontend: React 19, TypeScript, Vite, TanStack Query, React Router, Ant Design, Axios, Sass, RTL / Arabic UI
Mobile: Flutter, Dart, Cubit/BLoC, Clean Architecture, Dio, GoRouter, Firebase (FCM), Hive, SQLite, WebSockets (Laravel Reverb)
Testing & DevOps: xUnit (WebApplicationFactory), Vitest, React Testing Library, bloc_test, mocktail, Git, GitHub Actions (CI), Docker, IIS

EXPERIENCE

Software Engineering Intern (Full Stack) | 88ninety Jun 2026 – Aug 2026 | Part-time, Hybrid/On-site
Al-Tal Hospital Storage Management (On-Prem) | [Case Study] [GitHub] [Demo Video]

- Engineered a layered ASP.NET Core Web API (.NET 10, EF Core, SQL Server) and an Arabic RTL React 19/TypeScript SPA for an on-prem hospital warehouse system (IIS, zero cloud dependencies).
- Built JWT auth with rotating HttpOnly refresh cookies (SHA-256 hashed, JTI revocation, no Redis) and silent Axios refresh; a live role-permission matrix (`perm:<key>`) gates API endpoints and React routes.
- Modeled the FEFO inventory domain in EF Core (expiry-aware batches, locations, append-only movement ledger) with endpoints for receiving, internal requests, and digitally signed deliveries.
- Built the React materials catalog and storekeeper dashboard (TanStack Query, responsive Arabic RTL); added RFC 7807 errors, Serilog, rate limiting, and tests with xUnit and an 85-file Vitest/RTL suite.

Flutter Developer | ecoZone Apr 2026 – Oct 2026 | Part-time, Remote

- Owned the Flutter client for a multi-role marketplace (buyers, sellers, service providers, guests), scaling the app across 33 feature modules and 95+ screens on feature-first Clean Architecture and Cubit/BLoC.
- Built commerce flows end to end: catalog, cart, coupon-aware checkout, orders, inventory, promotions, and an in-app wallet with deposit and withdraw.
- Implemented realtime chat (media, voice, video, reactions, presence, read receipts) over Reverb and Firebase push notifications.
- Shipped Arabic/English localization (1,300+ strings), RTL/LTR, light/dark themes, loyalty and dispute systems, and 27 test files covering cart, chat, loyalty, disputes, and coupons.

Freelance Flutter Developer | Remote 2024 – Aug 2026

- **Qeyadah (Driving School):** Sole Flutter developer on a bilingual booking app: Sham Cash deposit flow, typed Either failures, 130+ unit/bloc tests, GitHub Actions CI | [Case Study] [GitHub] [Demo Video]
- **Mawaqef (Smart Parking):** Solo-built parking app (BLoC, Dio, get_it): OpenStreetMap discovery, booking and payment, owner dashboard, HTTP 409 booking recovery | [Case Study] [GitHub] [Demo Video]

University Team Project | Damascus University 2025

- **Shifaa (Doctor Appointment Booking):** Co-developed clinic app with booking/rescheduling, doctor search, and RSA/AES-GCM encrypted chat; owned OTP auth, booking flows, and chat UI | [Case Study] [GitHub] [Demo Video]

EDUCATION & ADDITIONAL

Education: Damascus University — B.Sc. in Information Technology Engineering, Software Engineering
Certification: Flutter Training, OUSOS (100%) [Certificate] | **Languages:** Arabic (Native), English (Proficient)
Volunteering: Contest operations team, DCPC/SCPC/SYPU (2025–26) | Course Team Leader & Board Member, RBCs (2023–26)
